

STRUCTURAL CONCRETING, MELBOURNE

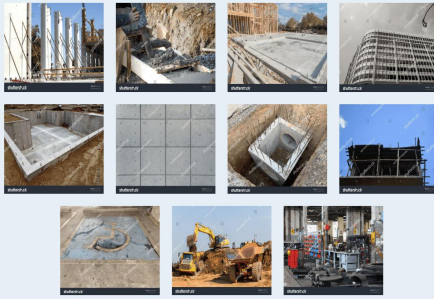

STRUCTURAL CONCRETING

When you need structural concreting services you can rely on, turn to a team with a solid reputation for consistently delivering high quality, professional and cost-effective concreting solutions.

Rapid Concrete Developments has been exceeding clients' expectations since our establishment in Kellor East in 2007. Our business focuses on providing structural concreting services for commercial and industrial sectors, with most of our work located across Melbourne's northern and western suburbs.

STRUCTURAL CONCRETING

We nurture the relationships we have with our clients and go the extra mile to ensure exceptional client care. We pride ourselves on maintaining the highest levels of professionalism, respect, honesty, fairness and integrity when it comes to looking after our clients.

RAPID CONCRETE DEVELOPMENTS

Health and Safety are part of our core values and something we refuse to compromise on. Rapid Concrete Developments strive to ensure a safe working environment and prioritise the health and safety of our employees, contractors, clients and those who work on or near our site.

CONCRETING PROJECTS

Throughout the entirety of our concreting projects, from site set to saw cut, we work hard to ensure efficient communication between our employees and clients. We believe that the standard of communication is an integral part of our business — for both our company and our clients.

PARTNERSHIPS

As the sister company of Rapid Concrete Developments, AUS Wide Laser Screed Services has the skill, knowledge and machinery to ensure the highest standards of concreting services.

AUS Wide Laser Screed Services delivers efficient solutions across Melbourne with our US-made Lighthouse ScreedSaver Max Pro and experienced team.

Our operators are fully trained and certified and have extensive experience in achieving high quality laser screeded slabs. Our solution reduces labour costs therefore enabling an increase in production. Get in touch with us to find out how AUS Wide Laser Screed Services and Rapid Concrete Developments can assist with your concreting project.
